## PORT OF SAVANNAH PIPELINE# 2010-03

ENF-SV:MUP

**TO:** Port of Savannah Customs Brokers, Freight Forwarders, Importers and Other Interested Parties

**FROM:** Area Port Director  
Savannah, Georgia

**SUBJECT:** Automated Commercial Environment Entry Summary, Accounts, & Revenue

On December 30, 2009 the Federal Register (Volume 74, Number 249, page 69129) notice was published concerning the Customs and Border Protection's (CBP) plan to conduct a test of the Automated Commercial Environment Entry Summary, Accounts and Revenue capabilities. The test will commence no earlier than January 17, 2010 and continue until concluded by an announcement in the Federal Register. The test is the first step toward full electronic processing of commercial importations with a focus on defining and establishing an importer's account structure.

These new capabilities include functionalities specific to the filing and processing of anti-dumping and countervailing duty entries and case management. Importers and authorized parties will be allowed to access their customs data via a web-based Account Portal. The notice also describes the eligibility, procedural and documentation requirements for voluntary participation.

The Port of Savannah encourages your participation in the program. Any questions regarding this notice should be directed to Melanie Phillips, Supervisory Import Specialist at 912-447-9425.
